

Wood Products . . .

Full Service Wood Products Facility

MCAAP has a full service Wood Products Facility. This includes an Automated Pallet Machine, Heat Treating Chambers and M-Guard Wood Preservation Dipping Facility. MCAAP specializes in producing and treating various sizes of pallets and boxes meeting the European Insect/Nematode Criteria.

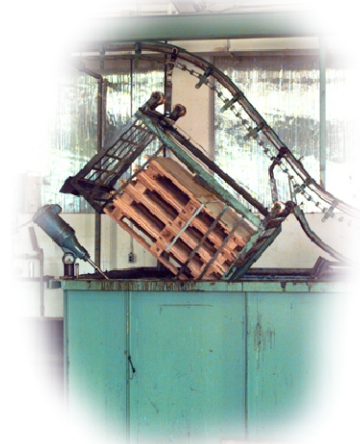

AUTOMATED PALLET

MACHINE: The pallet machine produces various size pallets for military and commercial customers that meet all ammunition requirements.

M-GUARD WOOD

PRESERVATION DIPPING FACILITY: The dipping facility treats pallets and components with M-Guard 550 wood preservative and pest retardant.

BUNDLE SAW:

The bundle saw cuts palletized lumber and increases board feet cut capabilities.

HEAT TREATING CHAMBERS: MCAAP has one of three heating chambers in Department of Defense (DOD). The chamber destroys insects and pests in pallets, wood products, packing materials, and equipment. The heating chamber is mandated by the European Community and United Nations International Plant Protection Convention and is approved by the USDA.
